Felizardo,

As you've stated recently our contract has nature "Labor and Materials",
http://en.wikipedia.org/wiki/Labor_and_materials

and I agree with you. That's why, I am concerning about "Materials", which balance is

Balance = Materials actually installed at the roof (may be calculated very precisely) +
materials broken and dumped as per receipt sent to me by you + 4 boxes of tile, which you
took from my site

Would you please provide me all calculation necessary to determinate Materials Balance
mentioned above?

Regards

Fatekh Vergasov
